RenovaTips™ by Raine.

Engineered to Exceed.

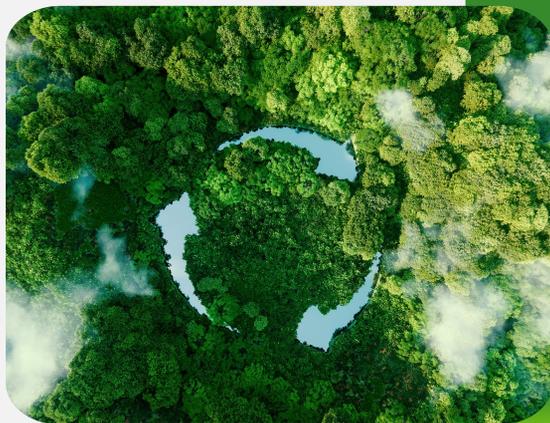

DURABLE AND EFFECTIVE MATERIAL

- RenovaTips™ minimize the risk of damage and preserve the sterile barrier system integrity for the finished device.
- Made from TPE, a biocompatible material developed for lasting performance, stable strength and flexibility.
- Designed for use in non-sterile and sterile products. Compatible with various sterilization cycles including steam, EtO and gamma.¹

ENHANCED DESIGNS

- RenovaTips™ are engineered with precision to optimize ventilation while ensuring protection.
- Anti-roll design with multiple patents pending.
- Endless product applications and opportunities. Ideal for orthopedic implants, surgical instruments and tools, trocars and more.

SUSTAINABLY FOCUSED

- PVC and Silicone free. Our products are made from TPE, an eco-friendly alternative that reduces the use of harmful materials in healthcare settings.
- Circular design allows for closed loop recycling.

1. Material has been tested for various sterilization methods. Final validation remains the responsibility of the end user.

High-Value Protection for Every Step of the Process

Trusted Protection You Can Count On.

At Raine, we don't just cover instruments, we preserve precision, protect integrity, and empower performance of your products.

TOOL AND TIP COVERS - PRODUCT SPECIFICATIONS
