

Eco VistaGuards™ — A New Era of Smart, Sustainable Protection

MATERIAL DIFFERENCE

- Made from a bio-based material that is ISCC Plus certified.
- Developed for lasting performance with stable strength and flexibility.
- Compatible with various EtO and gamma sterilization cycles.¹

ENHANCED DESIGN

- Engineered with precision to optimize ventilation while ensuring protection.
- Endless product applications and opportunities.

SUSTAINABLY FOCUSED

- PVC and Silicone free. Our products are made from TPE, a human and environmentally friendly alternative that reduces the use of harmful materials in healthcare settings.
- Circular design allows for closed loop recycling.

ECO RENOVATIPS™ TOOL AND TIP COVERS - PRODUCT SPECIFICATIONS

TP-007CMB	Bio-based Clear Flat Tip Protector	0.375	1	9.5	25.4
TP-008CMB	Bio-based Clear Flat Tip Protector	0.625	1	15.9	25.4
TP-009CMB	Bio-based Clear Flat Tip Protector	1	1	25.5	25.4

1. Material has been tested for various sterilization methods. Final validation remains the responsibility of the end user.

raine

Eco VistaGuards™ – Clarity You can Trust.
Protection You Can Count On. Breathe
new life into your essential medical tools
—while protecting the environment
they’re made in and made for.

Pure Clarity. Proven Protection.

VistaGuards™ were engineered to combine high-transparency with reliable protection and set a new standard in safeguarding critical medical devices through every stage of handling, shipping, and sterilization.

Now, we’re taking that commitment even further with our newest innovation: Eco VistaGuards™ by Raine. Crafted from ISCC PLUS certified bio-based materials, Eco VistaGuards™ deliver the same trusted performance while minimizing environmental impact.

Choose Raine for precision protection with purpose.

Our mission is simple: to help preserve the integrity of your instruments—so they’re ready to perform at their best, time and time again.
