Prioritizing Patient Safety, Delivering Care Faster

RenovaTips™ by Raine deliver durable and effective, sterile-ready instrument protection that enhances workflow and preserves what matters most: reliability and patient safety.

Our purpose is clear: safeguard the integrity of your instruments and tools, so they're ready to perform — again and again.

EFFECTIVE APPLICATION

- Up to 150% increase in ventilation resulting in 2.5X the amount of surface area exposure to sterilant during the sterilization process.
- Made from TPE, reducing the use of harmful PVC in healthcare settings.
- Competitive pricing resulting in low operational costs.

DURABLE AND RELIABLE

- Custom material formulation designed to retain the same properties including hardness/strength, flexibility and sizing without sacrificing quality.
- Material advantages include the prevention of oil buildup on parts.
- Designed to withstand steam sterilization.

DESIGNED TO MAXIMIZE EFFICIENCY

- Created with the application and technician in mind, these include a new anti-roll design to prevent rolling off from flat surfaces.
- Translucent part colors retain instrument visibility.
- Available in multiple sizes and color options.

"Patient safety is not just about preventing harm, but also about promoting well-being."
